OLD ISKU FURNITURE FACTORY

YEAR: 2021 – 2023

LOCATION: Lahti / Finland

CLIENT: Keskusportti
Kinteistö Oy (property)

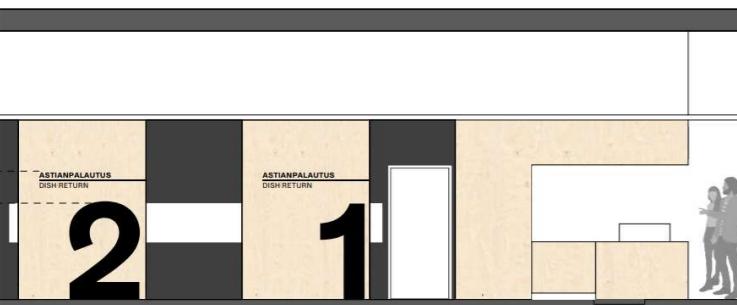

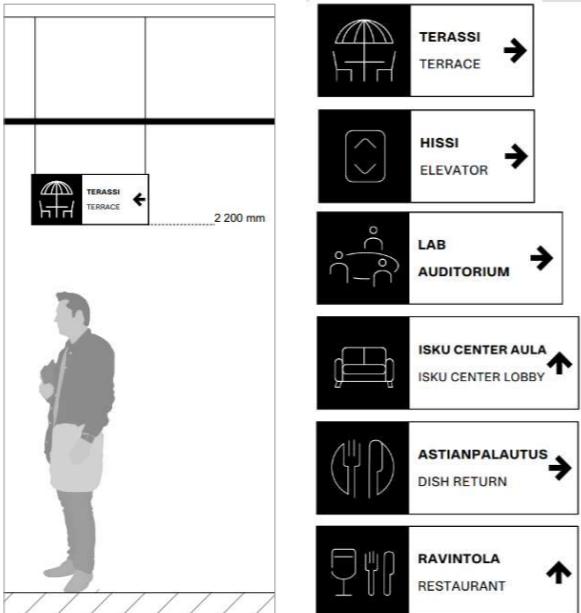

TYPOLOGY: Real estate
reuse

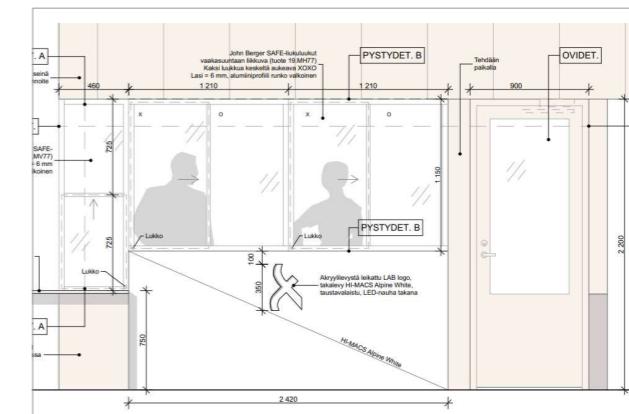

The renovation of Isku's old furniture factory aims to maintain the original 1958 building and gradually refurbish it for new uses and transform it into a modern student campus and business centre. The architectural design included the entire property and was focused in a new entrance, restaurant and cafeteria, reception areas but also corporate offices and laboratory spaces in the upper floors.

My contribution:

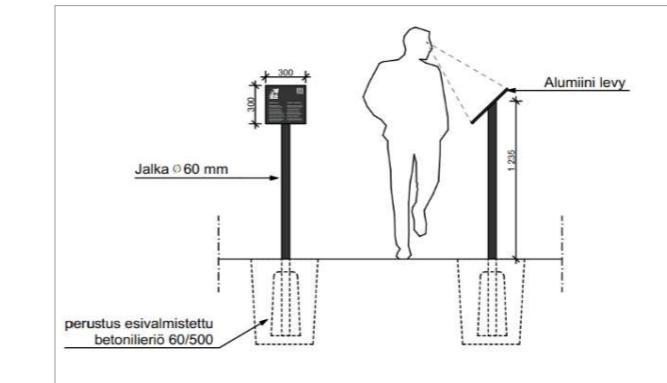

- Interior design for the new lobby area and restaurant
- Real estate and way-finding **signage design**, door signs
- Conceptual drafts for new tenants

Way-finding signage design

Reception desk design

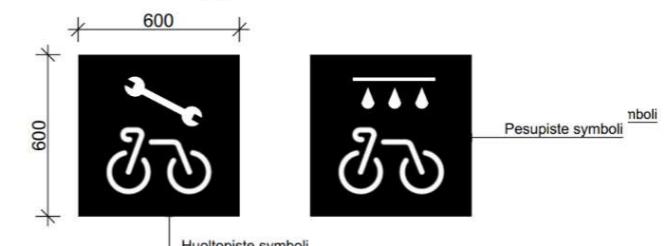

Kukanisty
Phytoparistötön perustettu kukanisty, joka edistää luonnon monimuotoisuutta ja tarjoavat elinympäristöä uhanalaisille perhosille, kimalleille ja kookkaille. Niityjen kasvihuonekuntas vahvistaa hotellitoimilla ja majoituskeskuksilla hoidon tarve vähenee ja joutuu majoitukseen. Monipuolinen ja kestävä kasvihuonekunta aloittaa kukinnan.

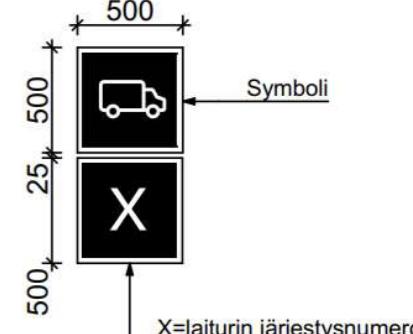

Paahdeympäristöt
Auringonlaista ja kuivaa elinympäristöjä, joissa maapinnaan lämpötila voi olla korkeampi kuin ilmanvaihto. Kasvit ovatkin monipuoliselle tärkeitä elinympäristöjä, joissa kasvit voivat kehittyä pitkäksi ajanjaksoksi.

Xerothermic habitats
Xerothermic habitats are sunny and dry habitats where ground surface temperature is significantly higher than its surroundings. They benefit from the sun and are important habitats for species such as endangered butterflies.

Wayfinding and Environmental Graphic Design

VIRTATALO BUSINESS CENTER

YEAR: 2022

LOCATION: Vantaa / Finland

CLIENT: Mutual Pension Insurance Company ELO

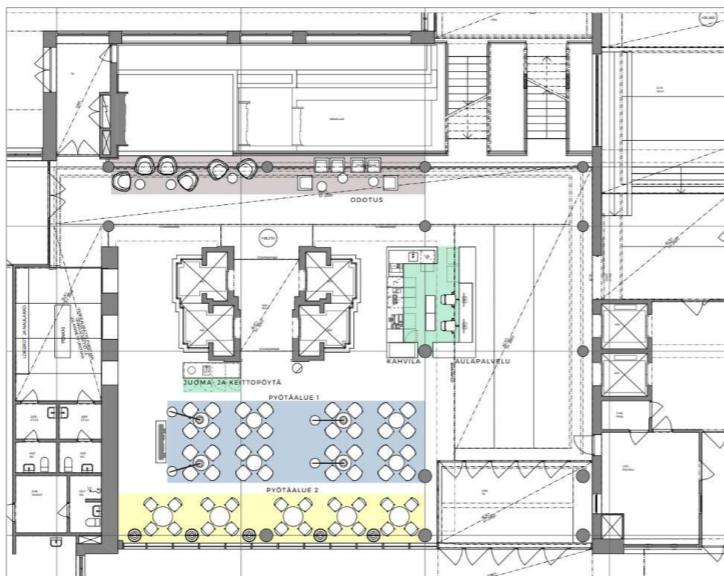

TYPOLOGY: Renovation and interior design

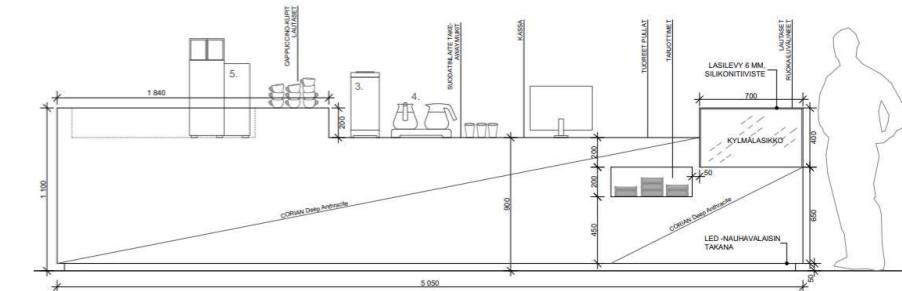

The focal point of this renovation project is the design of a new versatile desk area that serves both as functional reception and welcoming cafeteria. The layout maximizes space efficiency without compromising on comfort or style. The design includes also the interior of several meeting rooms on the same floor, a restaurant and the reuse of spaces in other floors

My contribution:

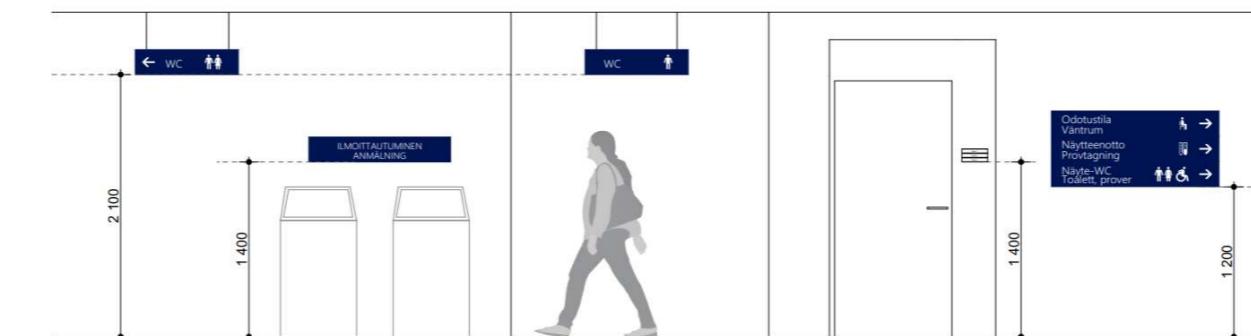

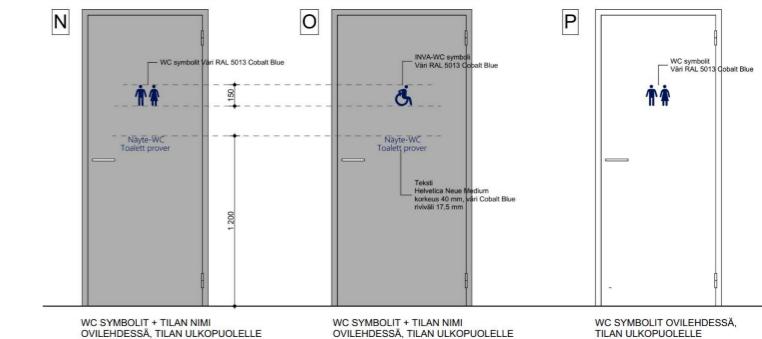

- Architectural and interior design for the reception area and office spaces in different floors
- Way-finding signage design for specific spaces

Entrance lobby proposal layout and interior design

Info desk and cafeteria design

Way finding and directional signs, door signs for a diagnostic centre

MULTIVAC OFFICE IN KERAVA

YEAR: 2024

LOCATION: Kerava / Finland

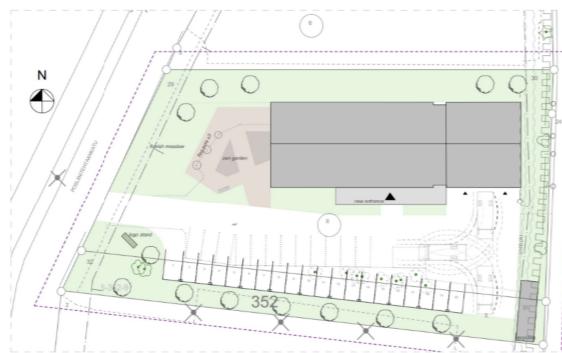

CLIENT: Multivac Oy

TYPOLOGY: Renovation

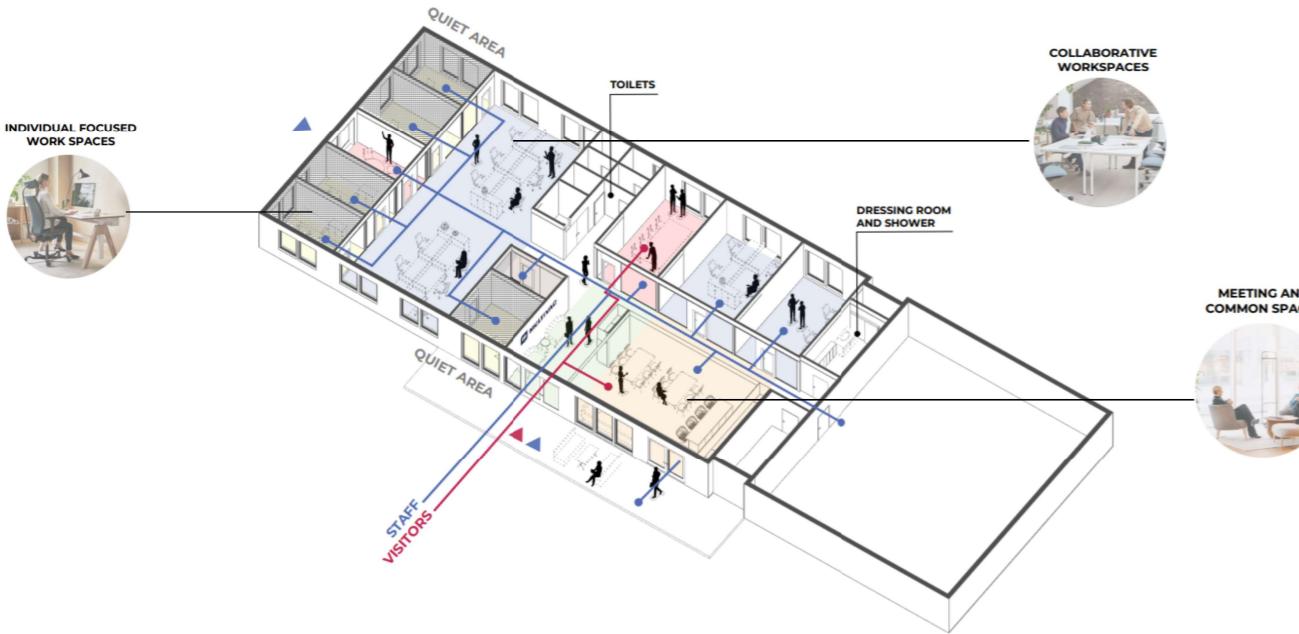

This project involves the renovation of a small building, focusing on both interior and exterior areas, to revitalize the company's image and create a more functional and inviting workspace. The goals include modernizing the aesthetic appeal, improving workflow efficiency, and enhancing employee comfort and collaboration.

My contribution:

- Concept and visual design

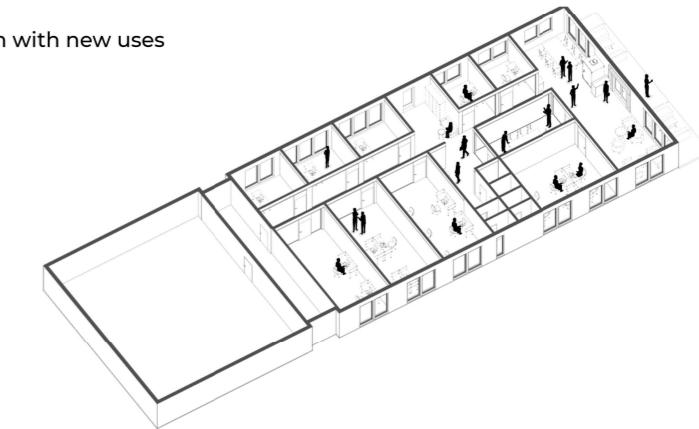

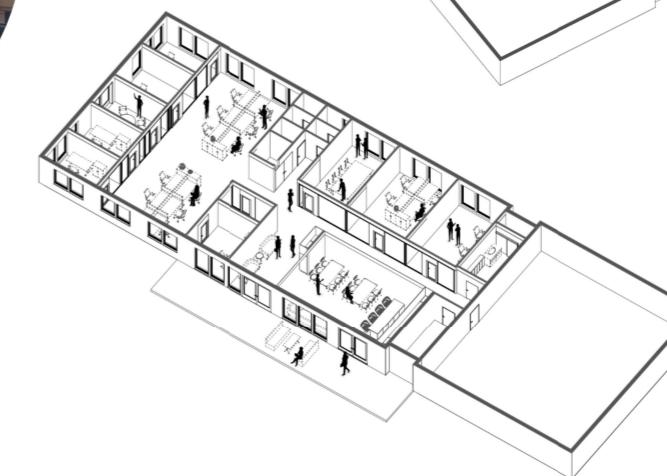

Landscape design

3D concept about the new office spaces distribution

Proposal floor plan with new uses

Concept proposals with different configurations for interior spaces

YEAR: 2019 - 2021

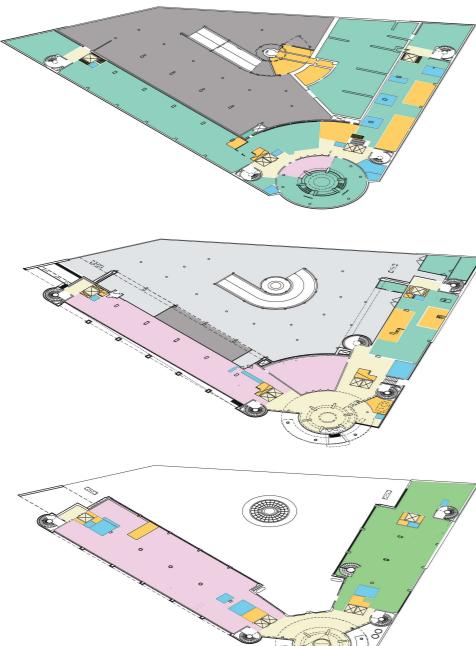

LOCATION: Helsinki / Finland

CLIENT: KOy Karjalaisen
HeimataloTYPOLOGY: Heritage building
renovation and extension plan

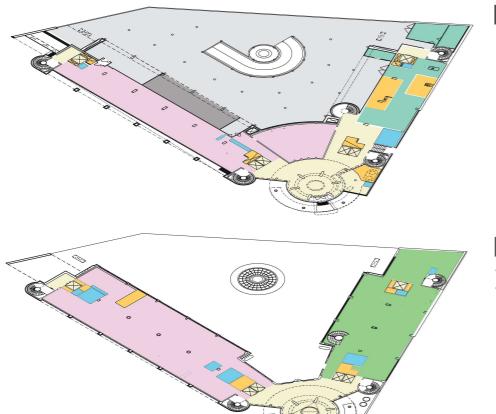

Karjalatalo is a cultural and event center owned by the Karjalan Association, a multi-functional building with a cultural significance and historical importance. The project includes planning changes, project management, and creating various proposals to meet client requests finding a good balance with practical considerations such as budget constraints, regulatory requirements, and architectural feasibility. The idea of the proposal is to maintain the historical building, with the conservation of the first 4 floors for the organization's activities and extend it adding on top of them residential apartments of different sizes with a terrace and sauna facilities.

My contribution:

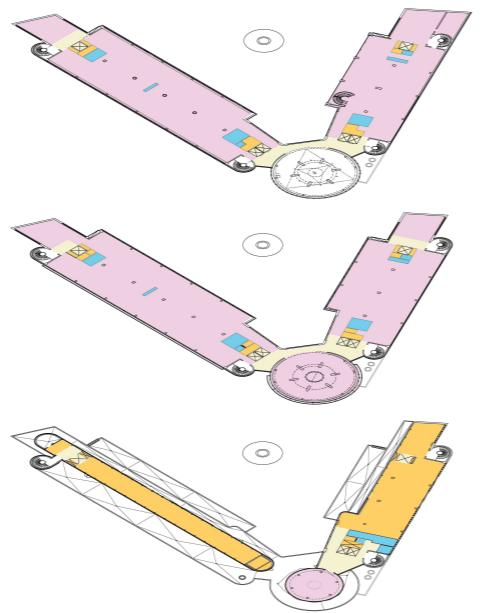

- Concept design graphics for new uses
- Interior design

MODULAR SCHOOLS

YEAR: 2019 - 2022

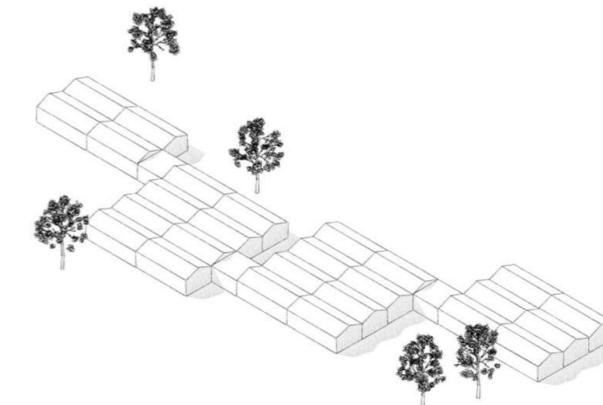

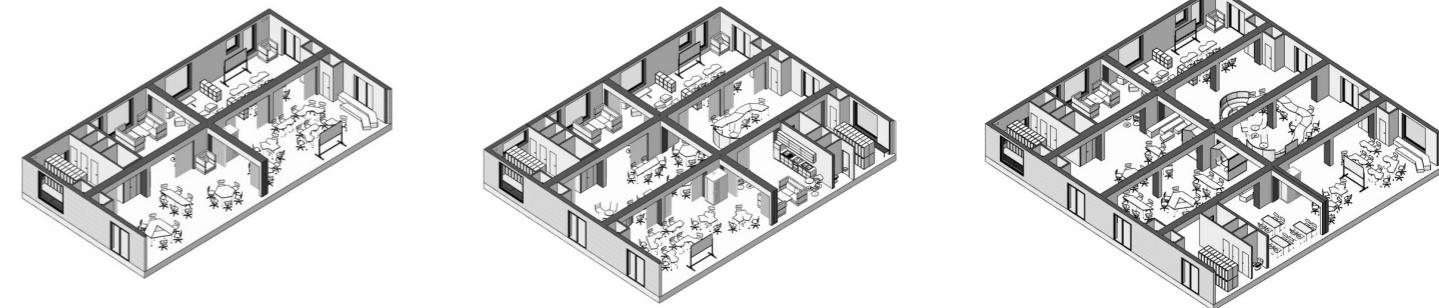

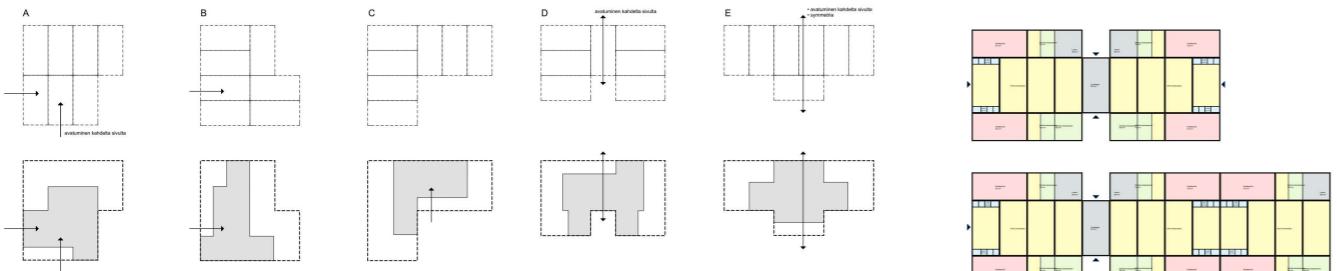

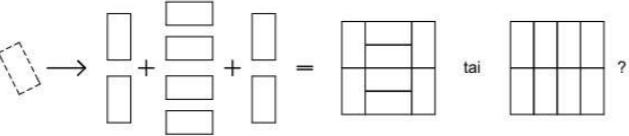

LOCATION: Finland

CLIENT: Fixcel Oy, now
Parmaco Smart BuildingsTYPOLOGY: New school
buildings and temporary
relocation

Beginning with a vision for flexibility, inclusivity and innovation, the project propose a concept that would transform traditional learning spaces into dynamic environments conducive to modern teaching methods, accommodate the diverse needs of students, including those with intellectual disabilities and/or autism spectrum disorder, in collaboration with end-users and pedagogical professionals. A key feature of these projects was the utilization of a patented steel frame technology.

My contribution:

- Proposal and concept development design

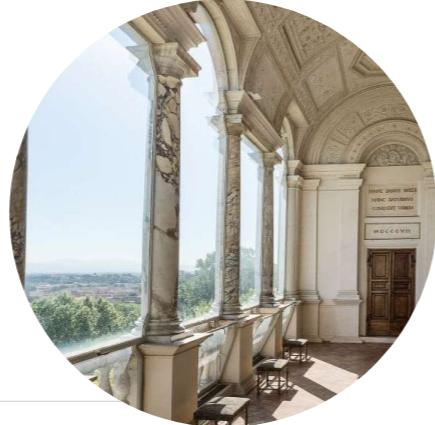

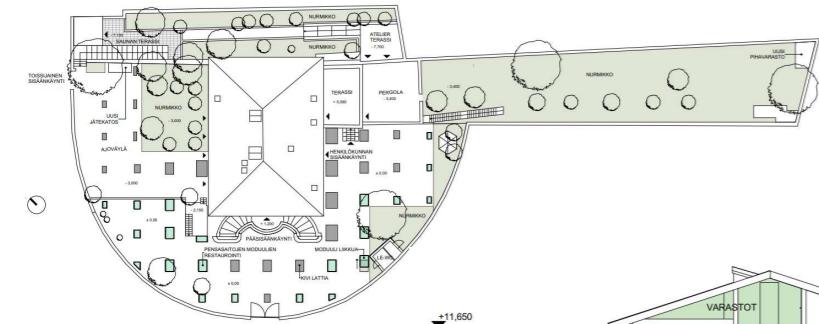

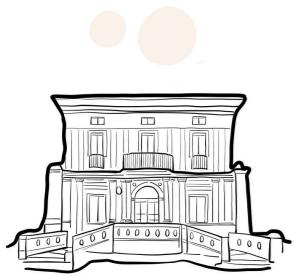

VILLA LANTE

YEAR: 2018 - 2019

LOCATION: Rome / Italy

CLIENT: Ministry of Foreign Affairs of Finland

TYPOLOGY: Heritage building renovation project planning

Villa Lante is a Renaissance building in Rome, owned by the Finnish State and is the headquarters of Finnish Institute in Rome, an academic organisation dedicated to promoting humanities and supporting its fellows and researchers in their work in Italy. The aim of the project was not only to preserve its historical legacy but also transform it into a vibrant hub for cultural exchange, artistic expression, and community engagement, ensuring its relevance and vitality for generations to come.

My contribution:

- Architectural survey on site
- Conservation approach
- Proposal and project planning

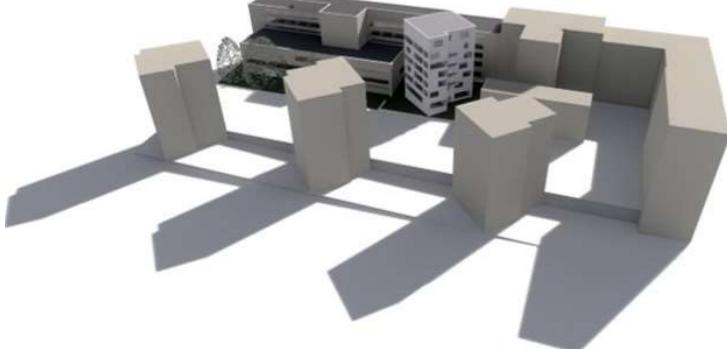

HOUSE OF PARISHES

YEAR: 2017 - 2019

LOCATION: Helsinki / Finland

CLIENT: Helsinki Parish Union

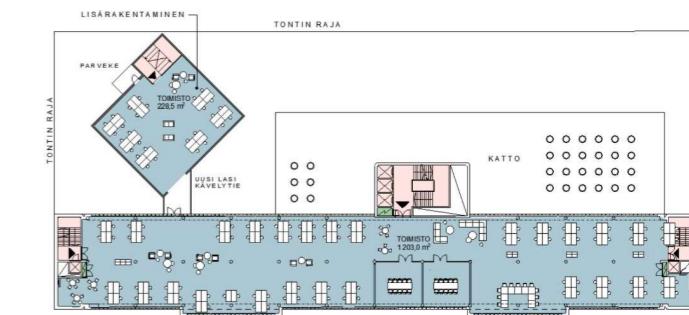

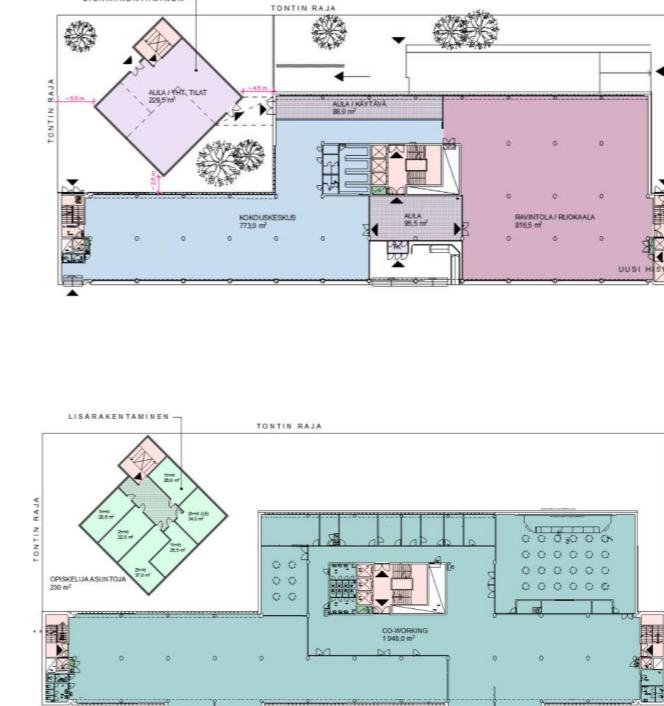

TYPOLOGY: Heritage building
reuse proposal design and
renovation

The Helsinki parish union office building, completed in 1979, is the object of this project plan to understand how to possible reuse it with different functions and evaluate the possibility of an extension. The project plan suggests dedicating spaces to various activities, with the aim of optimizing functionality offering various layout options to suit diverse needs and opportunities for the neighbourhood community.

My contribution:

- Site analysis
- Adaptive reuse proposal design
- Feasibility study for extension with additional building

OFFICE HUB IN HELSINKI

YEAR: 2017 - 2019

LOCATION: Helsinki / Finland

CLIENT: Sponda Ltd

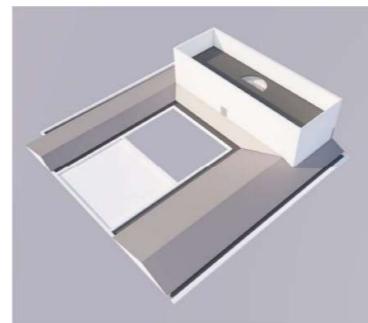

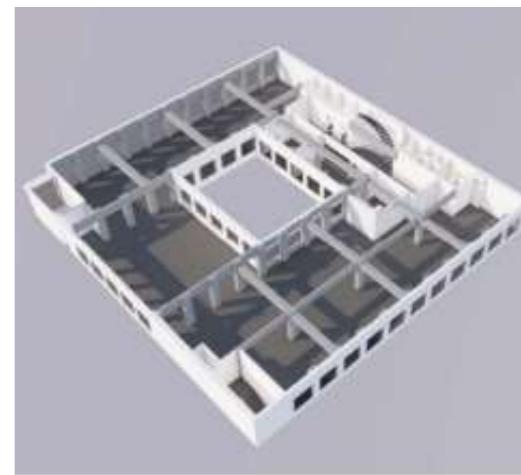

TYPOLOGY: Draft plan,
extension evaluation

This planning design aims to transform a business centre into a contemporary and more efficient workspace. The combination of interior demolitions to create more open and flexible spaces, site alterations to improve accessibility and utility, and extension proposals aim to improve the property's appeal and functionality. Maintaining the identity of the historical building, this project highlights the importance of concept design in maximizing the potential of a real estate in the city centre.

My contribution:

- Concept design for demolition planning and extension proposals
